MEDIATECH ANNOUNCES NEW BUTTONMATE EZ

Holly Hill, FL, April 4, 2005 -- Mediatech has announced a new enhanced version of their popular ButtonMate Plus control system interface.

Released as the ButtonMate EZ, it provides an “all-in-one” solution for small to medium control environments. The ButtonMate EZ can also be integrated with other Mediatech ButtonMate and/or ControlMate products for more powerful control systems. Features include: 6 selectable device output buttons, 90 discreet command string locations, 4 configurable Serial Ports, 2 IR Ports with user adjustable output power, a built-in IR learner with 64 memory locations, and 2 low voltage Contact Closure outputs. The flexible serial ports also allow any port to be used for an expansion port for combining multiple units or adding on other control modules for expanded control capability. The compact package fits into a standard three-gang electrical box opening for easy wall or surface mounting. The ButtonMate EZ comes with a standard or custom silk screened face.

A cost-effective solution for budget-minded classroom and small to medium presentation room requirements, the ButtonMate EZ includes a user friendly software utility that allows end users to configure it without complex proprietary programming. As a stand-alone control system, the ButtonMate EZ is a low cost and powerful solution. The ButtonMate EZ has a manufacturer’s list price of \$1,295.

Headquartered in Holly Hill, Florida, Mediatech is a privately held enterprise principally engaged in the research, design, development and manufacture of advanced presentation and control systems, products and services.
