

ButtonMate Lite Control Panel

PART#
MT-LT-BM

DESCRIPTION

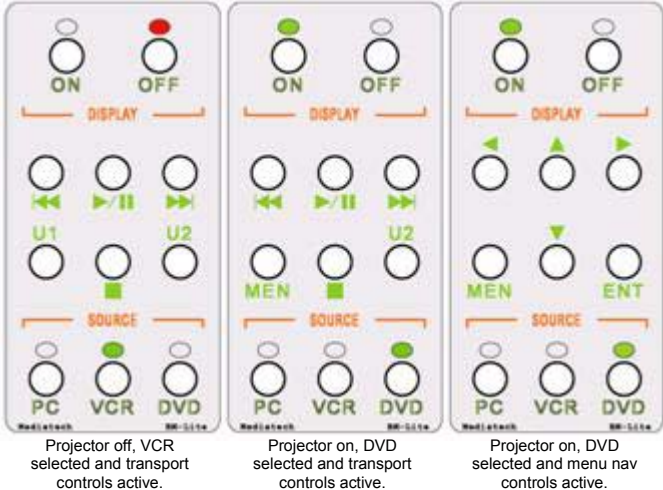

The Mediatech MT-LT-BM, ButtonMate Lite, is a configurable control panel capable of directly controlling RS-232 and IR controlled devices. The perfect low cost solution for a small form-factor, all-in-one button panel to control your audio/visual equipment.

The ButtonMate Lite may be used for direct control of one RS-232 device and multiple IR devices. Typical applications include A/V carts, classrooms, home theater, and board rooms.

FEATURE SUMMARY

- MS Windows®-based software utility for easy setup
- Configurable button command functions
- Built-In IR learner and internal command storage
- Internal storage for application specific information
- Non-Volatile memory for all settings and commands
- Robust configurable functionality
 - mixed format command scripting (IR and RS232), programmable delays, toggling command functions, time elapsed auto-execute commands (i.e., auto-shutdown), auto-power-up scripting
- Configurable RS-232 device control port
 - Baud rate, 7 or 8 data bits, parity support
- IR Device Control Port
- Configurations can be saved as files, emailed and reused
- Smart illuminating panel graphics for easy visibility in low-light
- Standard 1G electrical box sized panel accepts any standard trim plate to match your décor

Smart panel graphics illuminate based on the current operating mode and active functions...

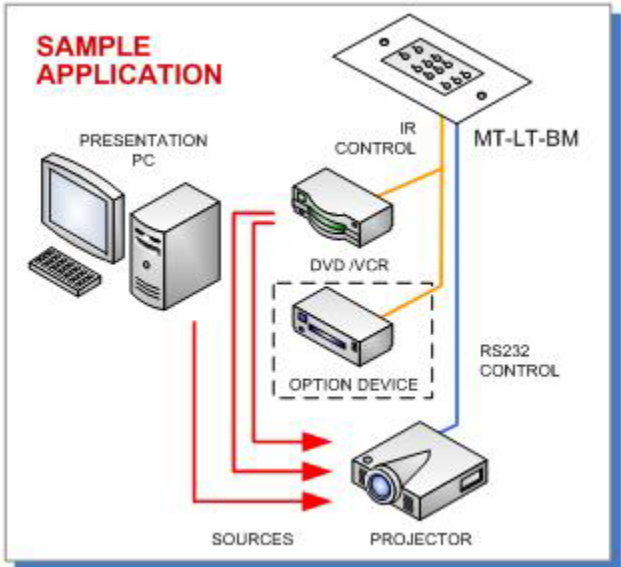

A wall or cart-mounted ButtonMate Lite can directly control an audio/visual equipment suite as shown in the sample application.

For specific application help, contact Mediatech or your local Dealer. Specification may be subject to change without notice.
