ButtonMate XLP

MT-XLP-BM-W, MT-XLP-BM-B

A wall, lectern, or cart-mounted ButtonMate XLP can directly control an audio/visual equipment suite as shown in the sample application.

The Mediatech ButtonMate XLP, is an easy to install, easy to configure control panel capable of directly controlling RS-232 and IR controlled devices. It's the perfect low cost solution for a small form-factor, all-in-one button panel to control your audio/visual equipment. Typical applications include A/V carts, classrooms, home theater, and boardrooms. With the add-on LAN module, the XLP is well-suited for combining in-room control with LAN-based asset management environments.

Standard features include:

MS Windows®-Based Software Utility for Easy Setup

Configurable Button Command Functions & Scripts

Built-In IR Learner & Emitter

Non-Volatile Storage for Settings or Commands

Security Code Access Protection

User Controllable Audible Feedback

Configurable RS-232 & IR Device Control Port
