## LanMate 2 IP Interface Module

MTC-2-LM

Typical applications include enabling Serial Interface projectors to be centrally monitored and/or controlled

The Mediatech MTC-2-LM provides an interface between an RS232 controlled device and an IP network. The LANMate works with Mediatech's ControlCenter (MT-CC-SW) and MT SystemCommander (MT-50-SY101) software applications to enable asset management for RS232 controlled devices. In addition, the LANMate is also a device server providing the capability to support a custom embedded webpage for the connected device to provide a web-based control interface accessible from any browser.

### Standard features include:

Enables Remote IP-Based Control of Serial Devices Over Wired Networks

Ethernet 10Base-T with RJ45 interface connector

Easily Configured, Controlled & Monitored Using Mediatech's FREE ControlCenter Software

500KB Storage Can Support Embedded Web Pages Allowing Custom Control Interfaces to Use Standard Internet Browser

Configurable Serial Interface Supports Data Rates of 9600 bps to 115,200 bps, 7 or 8 Data Bits, Parity

Small Form Factor Enclosure

RoHS-Compliant
