

## MT-100, SmartLectern Shell

**PART#**  
**MT-100** ..... **MSRP**  
**\$5,295**

### DESCRIPTION

The MT-100 shell is a basic lectern for those users who wish to add their own internal cabling and self-integrate their own systems and devices. It consists of:

- Hardwood Veneer (Natural Oak) Cabinet and Fittings
- Lockable and Removable Front Access Panel
- Lockable Doors
- Dual "Flip-and-Store" LCD Monitor Mount
- Retractable Keyboard Drawer
- Filtered Power Protector
- Equipment Cooling Fan

### A&E SPECIFICATIONS

The lectern shall be capable of holding the following equipment: (at a minimum):

- 2 ea PCs with keyboard and mouse
- DVD Player
- VCR
- Document Camera
- Wireless Microphone Amplifier
- Dual 15" or 17" side-by-side LCD monitors

Additional Configuration Requirements:

- The lectern shall be equipped with eight isolated and surge protected AC power receptacles operated by a single master power switch located inside a lockable cabinet door.
- The lectern shall have a locking retractable keyboard drawer wide enough to hold a PC keyboard and mouse side by side.
- The lectern shall provide a side shelf capable of supporting a Document Camera or other playback media up to 35 lbs.
- The lectern shall provide ample space so that monitor(s) can be physically configured in the lectern so ample surface is available for placement of papers and references.
- The entire front of the lectern shall be removable to allow for integration and maintenance access.
- The front access hatch of the lectern shall be locked in place by the locking action of the keyboard drawer.
- The lectern shall provide two equipment storage areas below the keyboard drawer; one area shall provide enough space for two mid tower PC's and the other area shall allow for adjustable shelving or 19" rack rails for mounting equipment.
- The lectern shall provide pressurized cabin cooling for the presentation equipment housed within the lectern.
- The lectern shall provide equipment access via two locking smoked Plexiglas and solid wood trim doors
- The lectern shall be typically constructed of oak 3/4" furniture grade hardwood core veneer and solid hardwood trim.
- The lectern shall have locking wheels capable of supporting a minimum of 550 lbs.
- The lectern shall provide an ergonomically adjustable computer keyboard shelf providing a healthier wrist-neutral position.
- The lectern shall contain a speaker shelf capable of holding two internal mounted self powered speakers.
- The lectern front access hatch shall have speaker cutouts covered with black speaker cloth.
- The lectern shall be equipped with single or dual "Flip and Store" LCD mounts to accommodate up to 17" LCD monitors and provide for lockable storage when not in use.
